

# Cole Bradley, CST

Coconut Street, FL | firstlast@email.com | 444-444-4444

Certified surgical technologist with five years of experience, including two years in orthopedics and three years in neurosurgery. Former EMT. Eager to contribute my skills to a team that strives for excellence, ensuring the best patient outcomes.

## Key Qualifications

- Proficiency in preparing operating rooms, maintaining sterile fields, and adhering to infection control guidelines.
- Knowledge of surgical instruments and operating room protocols.
- Familiarity with surgical procedures across different specialties.
- Competency in providing assistance to surgeons during procedures, including positioning patients and passing surgical instruments.

## Education

**Miami Dade College**, Miami, FL, 20XX

Associate of Science in Surgical Technology

GPA: 3.9/4.0

## Professional Experience

Neurosurgery Center, Surgical Technologist, 20XX–present

- Assisted with a wide range of neurosurgery procedures including craniotomies, spinal fusions, and tumor resections.
- Handled delicate neurosurgical instruments, such as neurosurgical drills, specialized clips, and suction devices.
- Positioned and secured patients for surgery, taking into account the specific requirements of neurosurgical procedures.
- Mentored newly-hired surgical techs, providing guidance and support to ensure smooth surgical operations.

Orthopedic Surgery Center, Surgical Technologist, 20XX–20XX

- Assisted in orthopedic surgeries, including joint replacements, fracture repairs, and arthroscopies.
- Managed surgical equipment, such as orthopedic implants, power tools, and traction devices.
- Handled specimens, ensuring proper labeling and documentation for analysis.

- Cleaned and restocked the operating room after each procedure, ensuring it was ready for the next surgery.

#### Miami Fire Rescue, EMT, 20XX–20XX

- Responded to emergency calls and provided pre-hospital care to patients in various medical emergencies.
- Performed basic life support interventions, including CPR, hemorrhage control, and airway management.
- Administered emergency medical treatments according to protocols.
- Collaborated with other EMS personnel, firefighters, law enforcement officers, and healthcare professionals to ensure timely and efficient delivery of care.
