

Abigail Morley, RN, CNOR

Connecticut Avenue, DC | firstlast@email.com | 111-222-3333

CNOR-certified registered nurse with 8 years of clinical experience, including 6 years in perioperative care. Specialized in neurosurgical procedures, with a dual background in circulating and scrub nurse roles.

Key Qualifications

- Specialized clinical experience across neurosurgical circulating, general surgery scrub, and med-surg inpatient care settings.
- Selected to mentor and precept new perioperative nurses, accelerating onboarding in complex surgical environments.
- Developed preop and intraop checklist protocols that minimized instrument-related delays in the unit.
- Provided four years of intraoperative support as a general surgery scrub nurse, ensuring optimal sterile field setup and instrument management.

Education

Capital University, Washington, DC, 20XX

Bachelor of Science in Nursing

GPA: 3.9/4.0

Professional Experience

City Hospital, Circulating Nurse, 20XX–present

- Manage daily workflow for up to 10 neurosurgical procedures, including tumor resections, craniotomies, and spine fusions.
- Verify patient identification, surgical site, and informed consent in compliance with Joint Commission standards and hospital policy.
- Develop and implement infection control protocols, contributing to a 20% drop in SSIs.
- Act as the primary troubleshooter for intraoperative equipment issues, minimizing downtime caused by device malfunctioning.

Suburb Hospital, Scrub Nurse, 20XX–20XX

- Assisted in over 1,200 surgeries across general, ortho, and cardiovascular specialties.
- Anticipated surgeon needs during complex procedures, ensuring optimal workflow and efficiency.
- Conducted thorough counts of sponges, needles, and instruments before, during, and after procedures to prevent retained surgical items.

- Participated in trauma call team, assisting in emergent procedures with rapid setup and instrument handling.

Village Hospital, Med-Surg Nurse, 20XX–20XX

- Delivered comprehensive patient care in a 30-bed medical-surgical unit, managing diverse patient populations with acute and chronic conditions.
- Conducted preoperative patient assessments and prepared patients for surgical procedures.
- Monitored and documented patient vital signs, medication administration, and response to treatments in accordance with nursing protocols.
- Educated patients and families on post-discharge care, medication management, and lifestyle modifications.

Skills

- Sterilization techniques and infection control
- Equipment preparation and surgical room setup
- Perioperative support across all phases of surgery
- Anticipate surgeon's needs and respond quickly in high-pressure situations
- Language comprehension: English and Polish
- Software proficiency: Epic and Cerner
