

Jacqueline Jankowski, MSN, CRNA

Night Sky, CA, 00000 || Cell: 000-000-0000 || firstlast@email.com || linkedin.com/janko
Certified registered nurse anesthetist with over seven years of experience safely administering anesthesia to high-risk patients during a variety of surgical and emergent procedures. Seeking an interdisciplinary environment to deliver exceptional anesthesia services.

Professional Experience

Pluto Hospital, Nurse Anesthetist, XXXX–present

- Execute individualized anesthesia care plans across a range of surgical specialties, incorporating patient comorbidities, procedural risk, and intraoperative requirements.
- Independently administer general, regional, and monitored anesthesia care for an average of 2–3 cases per day, including induction, maintenance, emergence, and post-anesthesia management.
- Comprehensive preoperative assessments, including medication reconciliation and risk stratification, to ensure patient safety and best possible surgical outcomes.
- Continuously monitor hemodynamic and respiratory status intraoperatively, titrating anesthetic agents and vasoactive medications in response to physiologic changes.
- Manage airways using techniques including endotracheal intubation and alternative airway devices, and respond to intraoperative complications.
- Detailed anesthesia documentation in compliance with institutional policies, regulatory standards, and billing requirements.
- Serve as a clinical preceptor and mentor to 8 nurse anesthesiology students, providing instruction, supervision, and performance feedback in clinical decision-making and skills.

Venus Hospital, Nurse Anesthetist, XXXX–XXXX

- Collaborated closely with anesthesiologists to design and implement anesthesia plans tailored to patient condition, surgical complexity, and procedural goals.
- Administered anesthesia for 1–2 cases per day under anesthesiologist's supervision, including induction, maintenance, and emergence phases of care.
- Managed patient airways before, during, and after surgery, ensuring adequate ventilation, oxygenation, and hemodynamic stability.
- Responded to on-call and emergent surgical cases, maintaining readiness for rapid assessment and intubation in high-pressure situations.
- Educated patients and families on anesthesia options, risks, benefits, and postoperative expectations to support informed consent and reduce anxiety.

Venus Hospital, Registered Nurse, Surgical-Trauma Intensive Care, XXXX–XXXX

- Delivered high-acuity nursing care to 2–3 critically ill trauma and surgical patients per shift in a 32-bed ICU.
- Titrated vasoactive drips, analgesics, sedatives, and antiarrhythmic medications based on provider orders and real-time patient response.
- Performed continuous hemodynamic monitoring, ventilator management, and neurologic assessments for unstable patients.
- Collaborated with a multidisciplinary care team of intensivists, anesthesiologists, CRNAs, respiratory therapists, CNAs, surgeons, and more to coordinate complex care plans.

Education

Neptune College, Astro, CT, XXXX
Master of Science – Nurse Anesthesia

Saturn University, Star Gazer, NY, XXXX
Bachelor of Science in Nursing

Skills

- **Advanced anesthesia practice:** Skilled in delivering general, regional, and monitored anesthesia care across diverse surgical cases, with a strong focus on patient safety and physiologic stability.
- **Comprehensive patient assessment:** Expertise in preoperative evaluation, airway assessment, and risk stratification to inform individualized anesthesia plans.
- **Intraoperative monitoring and titration:** Proficient in continuous hemodynamic and respiratory monitoring, with real-time adjustment of anesthetic and vasoactive agents based on patient response.
- **Airway management:** Advanced airway management skills, including endotracheal intubation and use of alternative airway devices in routine and complex cases.
- **Crisis management:** Calm, decisive response to intraoperative and on-call emergencies, drawing on critical care background to manage rapidly evolving clinical situations.
- **Clinical education and mentorship:** Experienced preceptor for nurse anesthesiology students, providing hands-on instruction, clinical supervision, and constructive performance feedback.
- **Interdisciplinary collaboration:** Strong communicator who works effectively with the broader care team.
- **Patient education and advocacy:** Adept at explaining anesthesia plans, risks, and postoperative expectations in a clear, patient-centered manner.
- **Documentation and compliance:** Thorough and accurate anesthesia documentation aligned with institutional policies, regulatory standards, and billing requirements.

Certifications and Licenses

- **CRNA Certification:** National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA)
- **APRN License:** State of California, License #XXXXXX
- **RN License:** State of California, License #XXXXXX
- **BLS:** American Heart Association
- **ACLS:** American Heart Association
