

Jane Rossi, RN

Cheddar, PA | firstlast@email.com | 123-456-7890

CDN-certified dialysis nurse with over five years of specialty experience. Past experience in medical-surgical nursing. Known for delivering compassionate, patient-centered care while maintaining strict adherence to safety and clinical protocols.

Key Qualifications

- Proficient in administering hemodialysis and peritoneal dialysis treatments, ensuring patient comfort and safety throughout the treatment process.
- Expert in priming dialyzers, setting dialysis machine parameters, and troubleshooting equipment to support uninterrupted treatment delivery.
- Experienced in identifying and responding to dialysis treatment complications, such as hypotension or electrolyte imbalance, with timely clinical interventions.
- Developed patient education protocols on home dialysis techniques, fluid management, and dietary compliance, reducing complications and hospital readmissions by 20%.

Education

Mozzarella University, Philadelphia, PA, 20XX

Bachelor of Science in Nursing

GPA: 3.9/4.0

Professional Experience

Feta Nephrology Center, Dialysis Nurse, 20XX–present

- Provided dialysis care for 25+ patients per week, including monitoring vital signs, administering medications, and managing vascular access.
- Monitored patients' vital signs, fluid balance, and clinical response before, during, and after dialysis sessions to promptly identify and address complications.
- Prepared, calibrated, and maintained dialysis equipment in accordance with facility protocols and infection control standards.
- Collaborated with interdisciplinary teams, including nephrologists, dietitians, and primary care professionals, to ensure continuity of care.

Ricotta Hospital, Med-Surg Registered Nurse, 20XX–20XX

- Provided comprehensive care to adult patients with acute and chronic medical conditions, including heart failure, diabetes, and COPD.
- Administered IV and oral medications, performed post-operative monitoring, provided wound care in accordance with physician orders.

- Documented assessments, interventions, and patient responses accurately in the electronic medical record to ensure continuity of care.
- Participated in quality improvement initiatives, contributing to a 15% reduction in patient falls by implementing structured patient rounding.

Skills

- Hemodialysis and peritoneal dialysis administration
- Vascular access care and assessment (AV fistulas, grafts, catheters)
- Dialysis equipment operation and troubleshooting
- Patient education for chronic kidney disease and home dialysis
- Language comprehension: English and Italian
- EMR proficiency: Epic, Cerner, and Meditech
