

Marcus Allen, LPN

Baltimore, MD 21201

marcus.allen@email.com | XXX-XXX-XXXX

Experienced Licensed Practical Nurse with 9+ years of practice across acute care, home health, and transitional care settings. Skilled in medication administration, post-acute recovery, chronic disease management, and patient education in both clinical and in-home environments. Known for strong clinical judgment, adaptability, and clear communication with interdisciplinary teams and families.

Professional Experience

Licensed Practical Nurse: Mercy General Hospital, 9A Med-Surg

Full-time | 20XX–Present

- Provide direct patient care on a 36-bed medical-surgical unit, supporting RNs with assessments, treatments, and care coordination for acutely ill adults.
- Administer medications, monitor IV fluids, and assist with blood transfusions under RN supervision.
- Supervised wound care, catheter insertions, glucose monitoring, and post-operative assessments.
- Collaborate with physicians, RNs, case managers, and therapy services to support safe discharge planning.
- Respond to changes in patient condition and escalate concerns promptly to the RN or provider.
- Educate patients and families on medications, post-discharge care, and symptom monitoring.

Licensed Practical Nurse, Harbor Home Health Services

Full-time | 20XX-20XX

- Delivered skilled nursing care to adult and geriatric patients in private homes following hospitalization or surgery.
- Managed complex medication regimens, including injectable therapies and IV infusions.
- Wound care for surgical sites, pressure injuries, and diabetic ulcers.
- Conducted in-home assessments to identify safety risks and implement fall prevention strategies.
- Educated patients and caregivers on disease management, equipment use, and care plan adherence.
- Coordinated care with RNs, physicians, social workers, and physical therapists.

Licensed Practical Nurse, Bayview Transitional Care Center

Full-time | 20XX-20XX

- Cared for patients recovering from orthopedic surgery, stroke, and prolonged hospitalizations.
- Monitored vital signs, intake and output, and pain levels during post-acute recovery.
- Assisted with mobility, rehabilitation activities, and ADLs to support patient independence.
- Maintained accurate documentation and communicated changes in condition to the care team.
